

NANOPACK WILL:

- Develop state-of-the-art antimicrobial packaging solutions
- Enhance food safety
- Prolong the shelf-life of food products by up to 25%
- Position Europe as a global leader in food nanotechnology
- Encourage technology transfer through the industrial and scientific communities.

PARTNERS

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 720815.
